*** ANNOUNCEMENTS ***

*** FREE FILES OF THE MONTH; SEPTEMBER

Food Science & Technology Abstracts (File 51)

CLAIMS/Current Patent Legal Status (File 123)

CLAIMS/US Patents (File 340)

Each month Dialog offers an opportunity to try out new or unfamiliar sources by offering \$100 of free searching (either DialUnits or connect time) in specified files. Output and Alerts charges are not included. For more details visit: <http://www.dialog.com/freefile/> and then take a moment to get familiar with another great Dialog resource.

*** "Thomson File Histories" are now available directly through Dialog in selected patent and trademark files. Combined with the comprehensive patent and trademark information on Dialog, file histories give you the most complete view of a patent or trademark and its history in one place. When searching in one of the patent and trademark databases, a link to an online order form is displayed in your search results, saving you time in obtaining the file histories you need. See HELP FILEHIST for more information about how to use the link and a list of files that contain the link.

EMBASE Classic (File 772) available to all customers.

NEW FILE

***File 457, The Lancet(R)

Web-measurement firm comScore adjusts methodology

CBS MARKETWATCH (STORIES)

March 14, 2007

SAN FRANCISCO (MarketWatch) - Web-measurement firm ComScore Networks Inc said Wednesday it has introduced a new way of counting Internet traffic, a move which may address growing concerns among online publishers about the accuracy of comScore reports.

The company in January quietly began counting the number of times a Web page is visited each day, a new metric it calls 'visits.' Before January, comScore reported only what are called 'page views,' a less-specific measurement that counts the average number of days people visit a site each month.

"Visits are a better measurement of engagement," comScore executive vice president Jack Flanagan said in an interview Wednesday. The company highlighted the changes in its February Internet-traffic reports.

ComScore, which provides influential yet controversial data on Internet traffic patterns, will also soon unveil a measurement of how often an Internet advertisement is actually viewed. Previously, the firm only counted what it calls 'page views,' which were then used as a "surrogate" measurement for how often consumers clicked on an ad, according to Flanagan.

The new measurements come as the company is under increasing pressure from Web publishers to explain why its traffic figures are often different - in some cases, significantly so - than those tallied by the publishers' own Internet servers.

Yahoo Inc., the world's largest Web publisher as measured by traffic, said the new comScore adjustments are a step in the right direction.

"This is by no means a silver bullet," but it does "provide a valuable reference," Yahoo executive Peter Daboll wrote on the company's official blog.

The controversy, once largely behind the scenes, has erupted into a rather public spat in the last few months as Web publishers are pressing comScore to submit to an audit by an outside firm. See earlier story on the controversy.

Yet Flanagan said those concerns are "a whole different story," and that they did not play a role in the recent changes, which have been in the works for the last six months.

Rather, the new metrics are a response to concerns regarding a new Web-design technique, known as AJAX, which allows Web pages to include more interactive features.

AJAX, or Asynchronous JavaScript and XML, has helped skew comScore's statistics, Flanagan said. While sites that employ the new technology present interactive features on the same page that Internet users have already viewed, those that don't use it now direct users to new pages, thus driving up their traffic count as measured by comScore.

"There are so many companies out there in the media world turning to new technologies that call into question a page view's relevance," Flanagan said.

Yahoo Finance and Google Inc.'s Google Finance are among the Web sites now using AJAX.
